

North Valley Animal Disaster Group Standard Operating Guidelines

Title: 4x4, ALL WHEEL DRIVE POLICY

Objective: To assure safe driving during a deployment

Description:

It is highly recommended that any vehicle that is used during a deployment into the field have 4x4 or All Wheel Drive in case additional traction is required due to poor road conditions, weather, traffic conditions, etc.

However, NVADG's policy is not to enter any area where, because of poor road conditions, it is necessary to engage 4x4 or All Wheel Drive systems to make access. It is suggested to have this feature so that you can escape during an emergency – not to enter an emergency.
